Personal and social competency is the set of abilities that relate to students' identity in the world, both as individuals and as members of their community and society. Personal and social competency encompasses the abilities students need to thrive as individuals, to understand and care about themselves and others, and to find and achieve their purposes in the world. This kit is designed to support opportunities to discuss similarities and differences, awareness (of one's family background, heritage(s), language(s), beliefs, and perspectives in a pluralistic society), understanding and appreciation of all the facets that contribute to a healthy sense of oneself (own well-being and the well-being of their family). Resources in this kit support exploring personal and cultural narratives, and understanding of how these shape our identity of self-worth, self-awareness, and positive identity.
